Objectives

Full stack junior developer applying my skills in python and javascript. My high motivation and drive to grow and learn programming allows me to consistently fulfill project requirements and look for ways to go above and beyond.

Languages and Frameworks

- Python
- Django
- JavaScript - Microsoft Certification
- MERN
- HTML
- CSS
- SQL

Programs and Software

- Linux
- IntelliJ
- GitHub

Creative Applications

- Photoshop
- Illustrator
- InDesign
- Premiere Pro

Projects

Safe Travels Website — Python, Django & Google Maps API

June 2019

Website created to allow users to view and share travel experiences to help others and plan trips and reminiscence on their own.

Utilized Python and Google Maps API to handle backend routes and requests.

Implemented Django's templating language along with CSS and bootstrap to create a legible, minimal and easy to navigate front end.

Mock Twitter Website — M.E.R.N

April 2019

Individual project to create a web application that allows users to view and create 'tweets'.

Utilized Express to handle backend routes and requests.

Implemented React to create a responsive and efficient frontend.

Mock Wikipedia Website— Python & Django

March 2019

Individual project to create a web application that allows users to search and create articles.

Utilized Python to handle backend routes and requests.

Implemented Django's templating language along with CSS to create a legible, familiar and easy to navigate front end.

Education

CodeCrew CodeSchool, Memphis TN

Jan 2019 - Jun 2019

Intensive coding boot camp

University of Tennessee, Knoxville TN

Aug 2016 - Sep 2018

Earned 85 credit hours towards an architecture degree with a 3.56 gpa
